Write code below that will do the following - try not to use your notes!

(a) Create a list to hold int’s.

(b) Add the numbers 1 through 10 to the list.

(c) Remove the value at index 4

(d) Replace the value at index 5 with the number 20

(e) Add the number 50 to the beginning of the list

(f) Print out the size of the list

(g) Add up all the numbers in the list using a for-each loop. Then print the sum.
